

Facial Recognition and Police Bias

This talk will focus on the use of predictive policing (crime mapping) and of facial recognition technology by Delhi Police and how these technologies have the potential to further marginalise the marginalised sections of the society.

Dr. Shivangi Narayan

Dr. Shivangi Narayan is working on a three-year project studying digital policing in India, funded by the Oslo Metropolitan University and Norwegian Research Council. She has an MPhil and PhD from JNU, Delhi and is the author of Surveillance as Governance - Aadhaar | Big Data in Governance. She is interested in looking at facial recognition technologies and the overarching infrastructure of police surveillance that informs current ideas of governance.

Date: March 9, 2022
